SilverSalmonCoin (SSC) – Whitepaper

Version 1.7 – May 2025
"Echoing both the courage of the silver salmon and the initiator's unwavering pursuit of new, sustainable ways to turn energy into nourishment for the world."

🎯 Vision

To build a meaningful connection between digital assets, solar energy, food innovation, and blockchain—creating a future where clean technology and sustainable food production go hand in hand.

🎯 Mission

Our mission is to integrate game-changing technologies with blockchain to drive real-world impact. By linking our token to innovations in energy and aquaculture, we aim to redefine how food is produced—smarter, cleaner, and more sustainably.

🐟 What is SilverSalmonCoin (SSC)?

SilverSalmonCoin (SSC) is a meme coin built on the Solana blockchain, designed to blend community energy with a meaningful mission. Inspired by the persistence of the silver salmon, SSC connects meme culture, clean technology, and sustainable food innovation through transparent, decentralized blockchain tools.

💰 Tokenomics

Total Supply: 1,000,000,000 SSC

Allocation	%	Tokens	Purpose
Liquidity Pool	70%	700,000,000	DEX liquidity and fair market launch
Development Reserve	10%	100,000,000	Platform upgrades, smart contracts, tools
Marketing & Partnerships	10%	100,000,000	Community growth, listings, campaigns
Community Pool	10%	100,000,000	Airdrops, meme contests, early incentives

All funds are held in public wallets for transparency and tracked on-chain.

🔧 Development Reserve (10%)

The development reserve funds all technical needs for SSC, including:

- Smart contract integrations (staking, DAO)
- NFT tooling (via Metaplex)
- Platform maintenance and site updates
- Transparent governance tools like multisig wallets

📢 Marketing & Partnerships (10%)

Tokens set aside to build and maintain visibility:

- Meme contests, giveaways
- Twitter/X and Telegram promotions
- Influencer partnerships
- Exchange listing fees
- Sponsored content and PR boosts

Marketing wallet activity will be trackable via Solana explorers.

🎁 Community Pool (10%)

This pool is designed to directly benefit and reward the community:

- Early airdrops and user incentives
- Meme campaign rewards
- "Shill-to-earn" activities
- Voting participation bonuses
- NFT giveaways

Tokens may be distributed via airdrop tools, staking partners, or manual transfers — all publicly announced.

📈 Liquidity Pool (70%)

The majority of SSC's supply will be provided as liquidity at launch:

- Initial launch via **Pump.fun**
- Tokens become immediately tradable on Solana DEXs
- Listing on aggregators like **Jupiter** and **Birdeye** follows automatically

This approach prioritizes decentralization, fair access, and transparency from day one.

📅 Roadmap – 2025
